KIMBERLY TOH YING HUI

STAFF PRODUCT DESIGNER • UI UX DESIGNER

ABOUT ME

Hey there! I'm Kimberly — a multimedia design major and Staff Product Designer with 11 years of experience in the UI/UX world. Since 2015, I've designed for apps, backend systems, websites, kiosks and POS systems across both B2B and B2C projects, creating experiences that delight users and drive results. I've worked with ASUS, HKTVmall, Malaysia's city council, Borneo's hotel group, and the country's top service provider, and also handle branding design for big corporations.

「Design is thinking made visual.」

WORK EXPERIENCES

Staff Product Designer (2024/10 - 2026/3)

- **KWS | Keyword Search** - Built an atomic component library in one week for a key 2025 project, helping speed up Phase 1 delivery and ship 25% ahead of schedule. Replaced a third-party service with an in-house solution, saving USD 50K per year and improving user behavior analysis.
- **HKTVmall WeChat Mini Program** - Led localization design for the China market, optimizing the checkout flow, simplifying microcopy, and applying China-specific UI patterns. After launch, daily active users grew by 300% and 25,000 registered users were acquired.
- **Hotel Booking** - Led UIUX design for HKTVmall's new Hotel Booking feature, delivering Phase 1 in just 3 months to support HKTV's 2025 travel-themed "CASHBACK" campaign. Optimized the search flow and maintained strict alignment with the core app's design system, creating a smooth and seamless booking experience for HKTVmall's 1.6 million monthly active users.
- **HKTV Design System** - After switching to HK design team, identified gaps in the consumer-facing design system, inconsistent UI across multiple projects, and a legacy interface that no longer met current product or aesthetic standards. Led the design system refresh by organizing and prioritizing key components for improvement, and facilitated multiple design review workshops to improve UI/UX consistency across future projects.

WORK EXPERIENCES

Senior Product Designer (2022/6 - 2024/10)

- **3PL Merchant Management System** - Independently designed the merchant-facing 3PL MMS system, covering stock-in, stock-out, and inventory management; introduced backend product, merchant, and subscription management modules with tiered permissions and a low-learning-curve workflow, driving 10–15% merchant growth and supporting the 2024 warehouse expansion.
- **Merchant Master** - Led the redesign of Merchant Master UX experiences to resolve multi-system fragmentation and permission issues, improving merchant task flow efficiency and reducing average task completion time from 5 minutes to 2 minutes.
- **Merchant’s Profile** - Led the redesign of the merchant profile experience to address fragmentation caused by multiple systems, including 3PL (2023) and ThePlace (2024). Reconstructed the task flow and resolved complex permission hierarchy issues, successfully reducing the average task completion time from 5 minutes to 2 minutes, representing a 60% efficiency improvement.
- **MMS Design Guideline** - Initiated and led the MMS Design System overhaul by building a comprehensive design guide for designers and developers, reducing clarification meetings by 70% and improving cross-dashboard UI/UX consistency to 90%.
